CORE COMPETENCIES

- Visual Design & Layout
- UX/UI with Responsive Design
- Business Automation
- E-Commerce System
- Google App Script
- Microsoft Power Automate

TECH SKILLS

- **Programming Languages**
 - HTML5, CSS3, JavaScript, C#, Python, SQL, Java, TypeScript
- **Frameworks**
 - Vue.js, React.js, React Native
- **Web Development**
 - Responsive Design, RESTful APIs, uvicorn, JSON, Canvas API
- **Mobile Development**
 - Android Studio (Java/Kotlin/XML)
- **Cloud & Deployment**
 - AWS EC2, WinSCP, Git

SOFT SKILLS

- Design Thinking & Solving Problems
- Time Management
- Creative Thinking
- Team Collaboration
- Observation & Attention to details

OTHER SKILLS

- Adobe Creative Cloud
- (Photoshop, Illustrator, Premiere Pro, Audition)
- Microsoft Office
- (Word, PowerPoint, Excel)
- FL Studio
- Davinci Resolve

LANGUAGE

- **Thai** (Native)
- **English** (TOEIC 675)
- **Japanese** (JLPT N4)

EDUCATION

- **Bachelor of Science (BSc)**
Information Technology (GPA: 3.15)
Thai-Nichi Institute of Technology (TNI) | 2021-2025

PROFESSIONAL SUMMARY

Junior developer with strong foundation in visual design, digital media, and web development. Experienced in e-commerce automation, multilingual platforms, and business process optimization. Proficient in modern web technologies alongside Adobe Creative Suite.

Actively pursuing career in RPA development, business automation, ODOO and QA automation testing. Focused on creating automated solutions that improve workflow efficiency and software quality.

WORK EXPERIENCE

○ 2025 - Present

BeBlock Bangkok Co. Ltd.,

Web Designer

- Develop and maintain web applications for a made-to-order ecommerce website for B2C customers with focus on automation and multilingual support.
- Design and implements business automation workflows using Google Apps Script and Google Sheet integration.
- Create responsive interfaces with interactive Canvas-Based components and real-time data visualization.
- Deploy and maintain production environments on AWS EC2 with 99%+ uptime cross-browser compatibility.

○ 2024 - 2025

A-HOST Co. Ltd.,

Cloud Engineer (Internship)

- Provided technical support to interns and staffs by troubleshooting software and hardware issues.
- Assisted in monitoring and maintaining database.
- Implemented an AI-based firewall log analysis system to detect anomalies and security threats.
- Utilized OpenAI models to analyze datasets using SQL query to manage the database and generate security insights using Python and display analytic results on a website created with Vue.js

KEY PROJECT

○ **Custom Acrylic Product Website** | Beblock Bangkok Co. Ltd.,

- Architected multilingual custom product e-commerce platform with Thai, English and Japanese for custom acrylic product manufacturing with automated order processing and payment workflows serving international customers.
- Developed dynamic pricing calculator with tier-based quantity discounts processing 5+ product types (keychains, stands, charms, coasters, carabiners) with complex pricing structures based on accessories, thickness, and colour options.
- Built automated order management system using Google Apps Script and Google Sheets, implementing 5-minute payment timers, QR code payment verification, automated cleanup workflows, and email notification triggers.

○ **Firewall Log Analytic with Generative AI** | A-HOST Co. Ltd.,

- Developed internal web application automating security report generation, reducing monthly reporting time from hours to minutes and eliminating third-party tool subscription to reduce non-profitable costs.
- Built automated data pipeline extracting firewall logs, categorizing threats, and populating SQL database for analysis and tracking.
- Created Vue.js security dashboard with threat analytics interactive visualizations and integrated OpenAI API using Python scripts to generate automated threat assessment reports for C-level executives, replacing manual Excel reporting.
