About me

- Junior developer with hands-on experience in process automation and web development
- **Passionate in RPA, automation, AI/ML solutions and Data Analysis.**

Education

- **Thai-Nichi institute of Technology**
Information Technology | GPA 3.15

Tech Skills

- **Programming Language**
HTML5, CSS3, JavaScript, Python, SQL, TypeScript,
- **Automation**
Google Apps Script, Power Automate
- **Framework & Database**
Vue.js, Next.js, React Native, SQL, Oracle
- **AI/ML Integration**
Gemini API, OpenRouter API
- **Web Development**
RESTful APIs, uvicorn, JSON, Responsive Design, Canvas API

Soft Skills

- Self-Initiative & Ownership
- Problem-Solving & Analytical Thinking
- Attention to Detail
- Time Management & Task Prioritization
- Adaptability
- Team Collaboration

Other Skills

- **Adobe Creative Cloud**
Photoshop, Illustrator, Premiere Pro, Audition
- **Microsoft Office**
Word, PowerPoint, Excel
- **Music & Video**
FL Studio, Davinci Resolve

Experience

Web Designer

BeBlock Bangkok Co. Ltd., | Nov 2025 - Present

- Built end-to-end **automated workflows** using Google Apps Script, payment timers, QR verification, email notifications — cutting manual order processing to near zero
- Designed and maintained multilingual e-commerce platform, handling tier-based pricing logic and order workflows for international customers
- Managed AWS EC2 cloud deployment, sustaining 99%+ uptime without dedicated DevOps support

Cloud Engineer (Internship)

A-HOST Co. Ltd., | Dec 2024 - Mar 2025

- **Automated manual Docx-based security reporting** by building SQL/Oracle-to-dashboard pipeline **with Gemini API integration**, cutting report generation from hours to minutes
- Identified unused historical firewall log data and independently proposed, designed, and built automation solution
- Monitored and maintained databases daily, supporting data extraction and integrity checks under senior engineer mentorship

Key Projects

Custom Acrylic Product Website | BeBlock Bangkok Co., Ltd.

Tech Stacks | Oracle Database 19c, Python, Vue.js, Gemini API (1.5 Flash)

- Built end-to-end automation system covering payment confirmation, QR verification, and customer notifications
- Eliminated manual steps across entire order journey for multilingual (Thai/English/Japanese) e-commerce platform

Firewall Log Automation with Generative AI | A-HOST Co., Ltd.

Tech Stacks | Google Apps Script, Google Sheets, HTML5/CSS3/JavaScript

- Designed and **implemented AI-assisted workflows using LLM APIs** to automate business reporting.
- Built integrations between internal systems, AI services, and backend APIs to reduce manual operations.
- Developed end-to-end automation pipelines combining business logic, APIs, and AI-generated outputs.

Language

- Thai — Native
- English — TOEIC 675
- Japanese — N4

Interests

- Video Editing
- Music Production
- Writing
